Inhalation:	If inhaled, remove from area to fresh air. Get medical attention if respiratory irritation develops or if breathing becomes difficult.
Eyes:	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention if irritation occurs.
Notes to Physician:	Treatment based on sound judgment of physician and individual reactions of patients.

5. FIRE FIGHTING MEASURES

Flash Point & Method:	>315 °C (COC) 600°F
Flammable Limits in Air – Upper (%):	Maximum % by volume of vapor in air above which propagation of flame does not occur on contact with a source of ignition: N/D
Sensitivity to Mechanical Impact (Y/N):	No
Sensitivity to Static Discharge (Y/N):	Sensitivity to static discharge is not expected.
Extinguishing Media:	Water fog, carbon dioxide, foam, dry chemical

Special Firefighting Procedures:	Containers can build up pressure if exposed to heat (fire). Fire involving large amounts of material should not be approached because individual containers may rupture abruptly causing "fireball" effect. Fire fighters should wear self-contained breathing apparatus and full protective clothing when fighting chemical fires. Use water spray to cool nearby containers and structures exposed to fire.
---	---

6. ACCIDENTAL RELEASE MEASURES

Action to be taken if material is released:	Wipe, scrape or soak up in an inert material and put in a container for disposal. Wash walking surfaces with detergent and water to reduce slipping hazard. Wear proper protective equipment as specified in the protective equipment section. Large quantity spills should be contained and pumped into drums for recovery or disposal.
--	--

7. HANDLING AND STORAGE

Precautions to be taken in handling and storage:	Keep container closed when not in use. Good hygienic practices should be observed. Work clothes should be washed separately at the end of each workday. Disposable clothing should be discarded with material. For food, plant, and other industrial use only. Do not add directly to food.
