FOODSAFE PETRO-LUBE PAG FG SERIES SYNTHETIC FOOD GRADE PAG GEAR LUBRICANTS

PETROCHEM'S FOODSAFE PETRO-LUBE PAG FG SERIES are polyglycol based gear lubricants formulated for use in enclosed gear systems operating where conditions demand the unique properties of these fluids. These fully synthetic polyglycol (PAG) lubricants are NSF H-1 registered and comply with the requirements of F.D.A. 21 CFR 1778.3570. Use these lubricants where there is the potential for incidental contact with food or food packaging.

PRODUCT FEATURES:

- Excellent wear protection, thermal and oxidation stability
- Reduced sludge and deposit formation to insure enhanced performance when compared with petroleum-based lubricants.
- Tough extreme pressure (EP) properties to protect metal from seizure and wear.
- Extremely good low and high temperature properties
- These lubricants are incompatible with other oils
- Special care should be taken when changing from mineral oil or PAO based product to PETRO-LUBE PAG FG oils to make sure the two types are not mixed. The systems should be flushed and cleaned of oil and residual sludge. All deteriorated seals should be replaced.
- Check lubricant after 2 days to ensure it is free of contamination, sludging or foaming.
- Available in 1 gallon, 5-gallon pail or 55-gallon drum
