CR FG SERIES

SYNTHETIC FOOD GRADE COOLER CONVEYOR CHAIN LUBRICANTS

CR FG SERIES lubricants are specially formulated for the Cooler Rack Chain applications in the Baking Industry where incidental food contact may occur. The lighter to medium weight viscosities prevent chains from stretching caused by excess loads of build-up from flour, sesame seeds and other airborne debris sticking to the chain.

PRODUCT FEATURES:

- Outperforms other lubricants and significantly reduces lubricant consumption
- Approved by the U.S.D.A. for H-1 applications (lubricants with possible food contact) and comply with the requirements of F.D.A. 21 CFR 1778.3570.
- Colorless, Odorless and manufactured from high quality Hydrocarbon base stock and selective additives for enhanced performance.
- Superior anti-wear additives to protect chain from seizure and wear and provides good adherence to the chain or metal surfaces.
- Enhanced rust, oxidation and corrosion inhibitors preventing gumming, varnishing and rusting.
- Available in 5-gallon pail or 55-gallon drum
